# Current Status of BAPETEN Licensing & Inspection System

Esturini Fitriyanti

IT Division Nuclear Energy Regulatory Agency 10 March 2015

## **Backgrounds**

BaLIS (Bapeten Licensing and Inspection System) is an information technology system for supporting the of licensing and inspection process.

The Licensing Modul covering the process of registration, evaluation, approval, issuance and payment of the lisencing.

BaLIS is the integrated information system which contents some related modules such as Licensing Module, Inspection Module, Radiation worker Module, Dose Evaluation Module and Payment Module.

# **BaLIS Functions**

- To Provide the qualified Data Management for Radiation Facility and Radioactive Substances Data inventory.
- Detecting radiation and radioactive substances source.
- To assist on decision-making process in the licensing and inspection activities.
- To Serve as Decision Support System
- To Improve Regulatory perfomance.

# SYSTEM SPESIFICATION

**Operating System** :Linux

- Web Server
- **Database Server**
- Scripting Language

- : Apache
- : MySQL
- : PHP

# INTEGRATION of BAPETEN LICENSING and INSPECTION SYSTEM

## **Main Features**

- Management Information System for Regulatory Control
- Specifically designed for Radioactive Sources and Radiation Facilities
- Relational Database (RDBMS)
- Web interface, multiplatform, multiple access
- Integrated Database (Licensing, Inspection, Radiation Worker, Dose Evaluation, Payment, and Reporting)
- User Leveling
- Country Spesific Requirements

#### Radiation Worker Module

# **FEATURES of LICENSING MODULES**

## Consist of :

- Licensing Process : Registration, Evaluation, Approval, Issuance, Print and License Delivery.
- Advanced Setting : Data Facilities, Data Sources, Data Surveymeter, Requirements.
- View/Report: Utilization license, sources, Radiation workers, surveymeter, License history, License Expired, Payment.

# **FEATURES of INSPECTION MODULES**

Advanced Setting Menu on Inspection, consist of:

- Pre-Inspection : Inspection Schedule, Inspection Form (Practice Specific Checklist)
- Post-Inspection: Input/Update Inspection Report, View/Print Inspection Report
- View/Report : Data Inspectors, Inspection Schedule, Inspection Form, Inspection Report

# **RADIATION WORKER MODULES**

- To Proccess of work permit for Radiation Protection Officer (RPO)/Radiation worker
- Administration : Input/Update Work permit, Data RPO/Radiation Worker.
- View/Report: Data RPO/Radiation Worker, Data Work Permit.

# **DOSE EVALUATION MODULES**

- To Calculate the radiation received by each of radiation workers
- Features : Input/Update/View Radiation Worker and dose evaluation.

# **Balis Online Modules**

BaLIS Online, consist of:

- Approval Export Import Sources Procces
- Approval to Returns of Radioactive Substances Used Procces
- Transportation Permit Procces
- Approval Determination of Termination Procces
- Exclusion Statement Procces

# **Balis Online Modules**

- Purpose of Online System :
- Application document from manual to digital
- Application by Online
- Realtime Online Payment
- Acceleration of the procces
- Reduce paper

# **Integration of Online System**

#### Selamat Datang

Peraturan Kepala Badan Pengawas Tenaga Nuklir Nomor 12 Tahun 2012 tentang Pemberlakuan Sistem Elektronik Dalam Kerangka Indonesia National Single Window di Lingkungan Badan Pengawas Tenaga Nuklir Pasal 2 menyatakan bahwa Bapeten memberlakukan sistem elektronik penanganan dokumen persetujuan yang berkaitan dengan ekspor, impor dan / atau pengiriman kembali (re-export) sumber radiasi pengion atau bahan nuklir dalam kerangka Indonesia National Single Window. Pelayanan persetujuan ekspor, impor dan/atau pengiriman kembali Sumber Radiasi Pengion dan Bahan Nuklir ini dilakukan dengan sistem elektronik melalui Balis Exim.

Balis Exim (BAPETEN Licensing and Inspection System for Export/Import) adalah sistem elektronik pelayanan persetujuan ekspor dan impor sumber radiasi pengion yang disediakan oleh Bapeten secara on-line melalui jaringan internet (public network). Sistem ini mengintegrasikan informasi terkait dengan proses penanganan dokumen permohonan persetujuan ekspor dan impor sumber radiasi pengion. Selain itu, sistem ini menjamin keamanan data dan informasi yang disampaikan oleh Pemohon dan memadukan alur proses kerja internal secara otomatis, yang meliputi : registrasi akun, pengajuan permohonan persetujuan, penilaian, pembayaran biaya persetujuan dan penerbitan.

Untuk dapat menggunakan layanan ini pemohon persetujuan ekspor/impor harus mempunyai akun Balis online. Bagi yang belum mempunyai akun dipersilahkan mendaftar terlebih dahulu melalui menu registrasi.
